Making a Difference Without Legislation
Cara Gluck
This session will focus on the initiatives taken to increase awareness across the state of Oklahoma. Participants will hear how family advocates have partnered with the local county and state health departments to increase knowledge and educate about CMV without state legislation and learn tips to apply these same concepts to your state.

Universal Congenital CMV (cCMV) Screening: Experiences of Newborn Saliva Collection From Five Minnesota Hospitals
Emily Graupmann & Whitney Wunderlich
During this session, the presenters will share information from the Minnesota study about the best cCMV universal testing process and will include lessons learned in talking with families at time of collection, performing universal saliva specimen collection, and processing.

Hearing & Congenital CMV (cCMV): Overview of Screening, Diagnosis, & Interprofessional Care for Infants & Children With cCMV
Angela Shoup & Albert Park
This session will provide an overview of the medical and audiologic evaluation of infants and children identified with cCMV who are symptomatic and asymptomatic, with or without hearing loss. The session will highlight the importance of interprofessional practice with various providers who support the network of care, highlight parental issues related to newborn hearing screening and cCMV, diagnosis, and emphasize the importance of building collaborative partnerships.

Universal Screening: The Ontario Story
Pranesh Chakraborty
Ontario is the first jurisdiction in the world to offer universal screening for congenital CMV. This session will discuss how cCMV screening was adopted as an expansion of the provincial Infant Hearing Program to include risk factors for hearing loss.
